

Fractions, Decimals & Percentages

PAPER A — MEDIUM

Name _____ Date _____ Score _____

Before you start

- No calculator. Every mark here is available with pencil, paper and the nine equivalents you memorised.
- Convert everything into **decimals** when you need to compare or order — it is almost always the fastest route.
- For a percentage of an amount, build it from 10%, 5% and 1%, or use a single multiplier. Pick whichever the numbers prefer.
- Write the unit and, where the question asks for a change, the word **increase** or **decrease**. Those words carry marks.

SECTION A — SHORT ANSWERS**1** Write each of these as a decimal. [3]**(a)** $\frac{3}{4}$ [1]
_____**(b)** 7% [1]
_____**(c)** $\frac{2}{5}$ [1]
_____**2** Write 0.35 as a percentage, and as a fraction in its simplest form. [2]

$$0.35 = \underline{\quad} \% = \underline{\quad}$$

3 Work out $\frac{1}{2} + \frac{1}{3}$, giving your answer as a single fraction. [2]

Answer

- 4 Find 20% of 350. [1]

Answer

- 5 Write the fraction $\frac{18}{24}$ in its simplest form. [1]

Answer

- 6 Write these three numbers in order, smallest first. You must show the values you compared. [2]

0.7 $\frac{3}{4}$ 72%

Answer

- 7 Work out $\frac{3}{5} \times \frac{2}{9}$, giving your answer in its simplest form. [1]

Answer

SECTION B — PROBLEMS

- 8 A jacket costs ₹1500. The price is increased by 12%. [2]

- (a) Calculate the increase in rupees. [1]

- (b) Calculate the new price. [1]

9 There are 40 students in a class. $\frac{3}{8}$ of them wear glasses. [3]

(a) How many students wear glasses? [1]

(b) What percentage of the class do **not** wear glasses? [2]

10 Work out $\frac{5}{6} - \frac{1}{4}$, giving your answer in its simplest form. [2]

Answer

11 A shop reduces the price of a bag from ₹880 by 25%. Calculate the sale price. [2]

Answer ₹

12 Aarav scored 34 out of 40 in his maths test and 42 out of 50 in his science test. By [3]
converting both scores to percentages, decide which test he did better in.

Better test

- 13** Convert $\frac{5}{8}$ first to a decimal, and then to a percentage. [2]

Answer

- 14** A water tank holds 2.5 litres when full. $\frac{3}{5}$ of the water is used. How much water is left, in millilitres? [2]

Answer ml

- 15** Last month a family's water bill was ₹640. This month it is ₹720. Calculate the percentage increase. [2]

Answer %
